Height Adjustable Desks: Height Range and Purchasing Information

The list below is meant to provide departments with examples; it is not an exhaustive list. Departments may choose to work with their preferred furniture provider. Each provider will have multiple desk sizes, shapes and colours, please contact them for a formal quote.

Prices are based on a 30” X 48” desk and do not include delivery, installation or taxes. Prices are approximate and have been increasing with the global supply chain issues. Please contact the vendors for a current quote.

**Recommended Dimensions** to fit the 5th to 95th percentile:

- Height range: Preferred: ≤22.6” to ≥48.7”. If this is not feasible, then ≤25” to ≥48.7” is acceptable; however, individuals ≤5’4 will need a footrest or keyboard tray.
- Depth: 30” preferred. For home offices 24” is acceptable.
- Width: Variable, depending on available space. Minimum 36”. Preferred 48 to 60”.

Background on Recommended Height Range

Rationale for Recommended Height Range:
• This height range will fit the 5th to 95th percentile (5’0 to 6’4) and is in keeping with the BIFMA G1-2013 furniture guidelines and CSA Z412-17 ergonomics guidelines.
• A 30” depth is recommended to minimize the risk of visual fatigue, particularly when looking at dual monitors

What to do for those outside the 5th to 95th percentile:
• Users shorter than 5’0 will still require a footrest in sitting.
• Users taller than 6’4” will require a higher desk, i.e. one that can go as high as 50”

Notes regarding desks that do not have the recommended height range:
If for some reason it is not possible to get a desk that goes down to 22.6”, then at minimum ensure the desk can go down to 25” and provide footrests for all users shorter than 5’5.

Avoid height adjustable desks that do not go below 29” as this is above elbow height for nearly all users. It is difficult to install a keyboard tray on height adjustable desks and many chairs do not go high enough for shorter users to work directly on the desktop.
