Remote work: Home Office Chairs

Across UBC, departments (or individual units) are responsible for purchasing furniture and equipment for the UBC office and faculty and staff are responsible for purchasing furniture for their home offices. The purpose of this document is to provide cost-effective office chair options for home offices. The list below is not an exhaustive. If you need additional assistance, please contact ergonomics.info@ubc.ca. If financially possible, we encourage you to review our standard list of ergonomic office chairs.

Considerations for Purchasing & Borrowing

1. **YOUR HEIGHT + SIZE**
   - Some chairs have the option to be ordered with **small**, **standard**, or **large** seat pans or have an optional **sliding seat depth adjustment**. If you are shorter than 5’5, taller than 5’11 or weigh more than 300 lbs, let the vendor know and they can assist you in determining which size is best for you.

2. **YOUR TABLE HEIGHT**
   - If you’re working with your keyboard on your tabletop, you want to make sure that your chair can go high enough so that your keyboard and mouse are below elbow level. Let the vendor know your table height to determine if you will benefit from a **standard** or **tall** gas cylinder. If borrowing your office chair, check that it will go high enough for your table. If your feet do not touch the ground, please use a footrest.

3. **YOUR FLOORING**
   - Let the vendor know if you have carpet or hard flooring in order to ensure that you have the correct **type of wheel**. If borrowing your office chair, you may need an area rug if you have hardwood floors.

4. **DELIVERY LOGISTICS**
   - Ask the vendor **how soon** the chair will be available, if **assembly** is required, if there are **labour fees**. Ask about the **delivery process**. Chairs typically weigh 60lbs, have a footprint of 26” X 26” and are 35 to 45” tall. Let the vendor know what to expect for the delivery in terms of parking availability, stair or elevator access. Consider any COVID-19 related concerns associated with the delivery. If picking up the chair, please use 2 people and ensure that both are comfortable handling this weight.

5. **FIT IN YOUR SPACE**
   - Measure your workspace to ensure the chair will fit. See above stated **dimensions**. Optional upgrades, colour and fabric customization may be available at an extra cost.
