# Manager's Checklist

## Prior to first day:

Complete Workday Onboarding set up tasks within Workday. If this is not completed, your new hire will not be able to access Workday Onboarding on their first day. There is an <a href="Onboarding Setup">Onboarding Setup</a> Workday job aid to support you.
Ensure new hire is included in all team meeting, mailing lists and any online channels used by your team for project work and social connection
Ensure new hire has the hardware and software needed to be successful remotely. Request this from IT (central or inhouse depending on your department) <b>two weeks</b> prior to new hire's start date <a href="https://it.ubc.ca/ubc-it-guide-working-campus">https://it.ubc.ca/ubc-it-guide-working-campus</a>
Schedule daily check ins with new hire during first week (can be less frequently after this as comfort builds)
Have team members schedule welcome conversations with the new hire in their first few weeks (to build trust through social engagement)
Have team prepare a short bio with photo, contact details and remote working style. This should be compiled and shared with the new hire in a welcome message on their first day
If desired: select a team member to act as a buddy for new hire. Team member should have a clear understanding of their role and time commitment. A buddy is someone who will introduce team culture, and who the new hire can connect with when they have questions. The buddy should also be available for informal "coffee chats" to help create connection and trust
