Food Sources of Calcium and Vitamin D

Food Sources of Calcium and Vitamin D?

Calcium and vitamin D are essential for strong bones. They also help the body absorb calcium from food and reduce the risk of osteoporosis. Good sources of calcium include dairy products, leafy green vegetables, and fortified foods. Vitamin D is found in fatty fish, egg yolks, and fortified foods.

How much calcium and vitamin D do I need?

The recommended daily allowance (RDA) for calcium is 1,000 mg for adults and 1,300 mg for older adults. The RDA for vitamin D is 600 IU for adults and 800 IU for older adults.

Food	Calcium (mg)	Vitamin D (IU)
1 cup milk	300	120
1 cup yogurt	300	120
1 cup cheese	300	120
1 cup fortified orange juice	300	120
1 cup fortified soy milk	300	120
1 cup fortified almond milk	300	120
1 cup fortified rice milk	300	120
1 cup fortified pea milk	300	120
1 cup fortified hemp milk	300	120
1 cup fortified flax milk	300	120
1 cup fortified oat milk	300	120
1 cup fortified coconut milk	300	120
1 cup fortified cashew milk	300	120
1 cup fortified sunflower milk	300	120
1 cup fortified walnut milk	300	120
1 cup fortified pistachio milk	300	120
1 cup fortified almond butter	300	120
1 cup fortified cashew butter	300	120
1 cup fortified sunflower butter	300	120
1 cup fortified walnut butter	300	120
1 cup fortified pistachio butter	300	120
