## Catalogue Disclaimer

The office equipment identified in this online catalogue are intended to provide information about products available for purchase. The prices listed are estimates only- please follow-up with vendors for up-to-date pricing. The UBC Ergonomics Program does not necessarily endorse or classify any piece of equipment as superior to other equipment; whether you will benefit from specialized equipment depends on personal factors, workstation layout and task demands. It is important that you consider all elements of your workstation systematically and try to make changes with your existing equipment before looking to purchase new equipment. The Ergonomics Program recommends that you refer to the online [Ergo Your Office Guide](#) or attend an [Ergo Your Office workshop](#) for useful tips on workstation set-up. Additionally, this catalogue does not replace the recommendations that could be made after an ergonomics assessment.

Please note that prices may vary and the posted prices in this catalogue should only be used as an approximation for budgeting. Taxes and installation (if applicable) are not included in the prices. Shipping is included in the price for Staples E-way products only.

## Office Equipment Demo Program—On Hold

The Ergonomics Program has a selection of mice, keyboards, back rest cushions, footrests and document holders available as demos. The demo program allows UBC staff and faculty to trial the equipment for 1-2 weeks prior to department purchase. Equipment listed in this catalogue with a “demo available” notice can be trialed after attending an [Ergo Your Office workshop](#).

## Chairs

For office chair recommendations, please consult the UBC Ergonomics Guidelines for Office Chairs [document](#).

## Sit-Stand Desks & Platforms

Purchasing information for [height-adjustable desks](#) and [sit-stand platforms](#) is available online. To participate in the sit-stand demo program, please consult the process [online](#).

## Headsets

Headsets may be necessary for employees who need to communicate by telephone as part of their work. Headsets can be in-ear or over-ear, wired or wireless. Over-ear headsets provide some passive noise cancelling. Wireless headsets may be useful for individuals who need to move around their workstation while on the phone. For additional information on headsets, please contact [Paul Maxwell](#) from Sensus Inc.

## UBC Office Ergonomics Process

The steps outlined below are intended to help guide you through the UBC ergonomics process. Before you begin making changes to your workstation or if you require advice and support from an experienced ergonomics representative, consider taking these steps:

### Step 1: Talk to your Manager

- Bring forward concerns of discomfort to your manager to determine what options are available within your department

### Step 2: Office Ergonomics Training

- Join us for our *monthly training sessions*. These are free for all UBC faculty and staff.

### Step 3: Online Assessment

- Email UBC's Ergonomics Program to register for an online assessment

### Step 4: Consult with a Department Office Ergo Rep

- Consult a trained Dept. Office Ergo Rep

### Step 5: Office Ergonomics Assessment

- Tried all the above and still having concerns?  
Contact UBC's Ergonomics Program to review your concerns and determine the next steps

---
